IDE

- Visual Studio
- IntelliJ
- Visual Studio Code

DATABASE SYSTEMS

- SQL Server Management Studio
- MySQL

ABOUT ME

I came across programming while looking for an apprenticeship. Since then, I have been very interested and fascinated by it. Besides programming I am also interested in football and gaming, so I combine those sometime with playing FIFA on the console.

APPRENTICESHIP

Workplace

VZ VermögensZentrum AG | August 2020 - Today |

- I am doing my apprenticeship at the VZ VermögensZentrum in Zurich
- VZ VermögensZentrum is the leading independent financial advisor and retirement expert in Switzerland.

School

BBW Berufsbildungsschule | August 2020 - Today |

- Learning job-specific moduls

ICT Berufsbildungscenter AG | August 2020 - July 2021 |

- Basic apprenticeship year for software developers

Projects/Work

- I am currently a member of the CRM Team, we maintain some of our internal financial applications.
- One of our main applications is the „Finanzdatentool“(= finance data tool), which is written in C# and is an n-TIER application. The main focus of it is on the preparation of retirement plans, this also includes creating Reports with DevExpress.
- Typically, my working experience involves developing projects in C# (Frontend with WPF, Angular or Blazor) and usually accessing SQL databases.
